Regulation Certificate

This certifies that the below mentioned substances are never intentionally used as additives in the manufacturing process, per the

Stolholm Convention on Persistent Organic Pollutants (POPs) Annex A, B, and C, and REGULATION (EU) 2019/1021 Annex I, II, and III.

Substances not used in manufacturing/not contained in the above listed product
[above specified threshold limits]:

POPs (Persistent Organic Substances)

This declaration is made based upon the ECHA list of POPs and the corresponding specified limits, as updated on August 11, 2023.

3DXTech discloses the above information based upon the data from our raw material suppliers or manufacturers. Note that routine raw material analysis, or analysis of 3DXTech Products for presense of the above listed substances is not a part of 3DXTech's quality control plan or product specifications requirements.

Rachel Minard, Product Manager
3DXTech

This document is for informational purposes only and does not constitute any warranty or legal binding in any manner whatsoever.

This declaration applies to the above product as it leaves the production facility. It does not cover any substances added, or modifications and/or improper material processing further down the supply chain.
